

Table 1: Accidents and Union Branches: Region (RD) Level

	(1) Pooled	(2) FE: County	(3) FE: Division	(4) FE: Line
Has accident	0.829*** (0.038)	0.830*** (0.039)	0.829*** (0.038)	0.832*** (0.047)
N	514	511	514	388
R^2 (within)	0.780	0.754	0.764	0.776
Fixed effects	None	County	Division	Railway line

Notes: Unit of observation is 1851 Registration District (RD). Sample: RDs with at least one rail station in England & Wales. Dependent variable: indicator for RD having at least one union branch. Key regressor: indicator for RD having at least one accident. Controls: $\log(\text{area}+1)$, $\log(\text{stations}+1)$. Column (4) identifies RDs on the same railway line; accident randomness is on the line. Heteroskedasticity-robust (HC1) standard errors in parentheses.

*** $p < 0.01$, ** $p < 0.05$, * $p < 0.10$.
